

Juliet

A personal iOS expense tracker · Built with Swift

PREFACE · WHY JULIET?

In Shakespeare's tragedy, Juliet keeps no accounts — she gives everything freely. This app is named after her as a quiet reminder: money, like love, should be intentional. Every rupee logged is a small act of self-awareness. Juliet doesn't judge your spending. She just helps you see it clearly.

01 · OBJECTIVE

A fully local, ad-free iOS app to log daily expenses, track income, monitor account balances and build financial awareness — no cloud, no subscriptions, no noise.

02 · FUNCTIONALITIES

Daily Log

Log expenses & income by day with tags & source

Recurring

Track subscriptions with renewal dates & metadata

Search & Filter

Keyword search, filter by tag, account or date range

Fund Guard

Blocks entry when account balance is insufficient

Analytics

Pie & bar charts by tag, account and time period

Wallet

Real-time balances, cashflow & weekly trend chart

Notifications

Up to 6 customisable daily reminders

Smart Calendar

Colour dots show income/expense days at a glance

03 · TECH STACK

SwiftUI

Declarative UI framework

SwiftData

Local persistence — no backend

Swift Charts

Native charting library

UserNotifications

Scheduled daily reminders

Swift 6

Strict concurrency model

1 iCloud Sync
Access data across all Apple devices

3 CSV / PDF Export
Download expense reports for external use

5 Shared Expenses
Split bills with family members

2 Budget Goals
Monthly limits with overspend alerts

4 Home Widgets
Glanceable balance & cashflow on home screen

6 AI Insights
On-device spending summaries & anomaly alerts

Juliet is a reminder that financial clarity doesn't need a subscription.
Built entirely on-device, it respects your privacy while giving you a complete picture of where your money comes from and where it goes.

Small logs. Big picture. Your money, your story.
